Use our water audit form to keep an eye on your water consumption. Saving water can not only help your monthly bills, but a reduction in hot water can help your energy bills too!

Turn off the tap when you clean your teeth. A running tap uses up to 6 litres of water a minute.

If possible, take a shower instead of a bath. A five-minute shower uses about 35 litres of water. This is about half the volume of a standard bath.

Think about fitting a water butt to collect rainwater off your roof. Water butts usually store about 200 litres of water.

Only wash full loads in the washing machine or your dishwasher! Buy energy-efficient appliances and save money on both your electric and water bills!

Use a watering can in the garden instead of a sprinkler or a hosepipe as these use 540 litres an hour

The average person in England and Wales use around 150 litres of water a day...
