2022 - 2023

# Wholesale Charging Scheme

This Wholesale Charges Scheme is made by Independent Water Networks Ltd (IWNL) and set out its Water and Sewerage Wholesale charges under the provisions of the Water Industry Act 1991. By the Act and the Licence the Company is authorised to set, levy and recover charges for any services provided in the course of carrying out its duties as a water undertaker and as a sewerage undertaker.

IWNL are only able to present indicative charges at this time. IWNL's costs of providing wholesale services depend to a great extent on the charges made by the local water company for the bulk supply of water to the IWNL site. The Ofwat investigation into the NAV market identified these boundary charges as a key barrier to competition. While Ofwat has concluded its consultation on boundary charges to NAVs, many incumbents have yet to publish their NAV charges. There are also instances where incumbents have not yet released their wholesale charges. IWNL will review its wholesale charges when this has occurred. In the meantime, IWNL will start from the position that it should typically be able to match the wholesale charges set by the water company in each area in which IWNL has a network, as reflected in the charges shown in this Charging Scheme.

However, specific requests for wholesale charges for both household and non-household property will have to be considered on an individual basis in order to offer cost-reflective charges because boundary charges can vary significantly between sites even within the same water company area, and not necessarily with any connection to the level of onsite costs.

There are two main types of wholesale services:

- primary services related to the supply of water and the removal and treatment of foul sewerage, surface water drainage and highway drainage; and
- non-primary services for activities that are not directly related to the provision of primary services.

The Non-Primary service charges have been developed to support retailer service requests. These charges have been designed to meet both the OFWAT Wholesale Charging Guidelines and the Wholesale - Retail Code.

The Wholesale Charges contained in this Charging Scheme are effective from 1st April 2022 until 31st March 2023.

Where IWNL is appointed to perform the role of water and / or sewerage undertaker for any newly connected customers, the local water company will typically leverage one-off connection payments (for example, infrastructure charges or environmental discounts), and we will treat these as a direct pass through from the local water company to the relevant end customer.
